

Product Description

ZinClear®XP35 MCT+SGLu is 35 wt% pre-dispersed Zinc Oxide in '**Medium Chain Triglyceride**' with Stearoyl Glutamic Acid as the dispersant, and facilitates the formulation of mineral sunscreens.

This dispersion can be incorporated as the main UV filter into primary sunscreens to achieve high target SPF; alternatively, it can also be used in secondary sunscreens such as Lip Balms; Facial Moisturizers; Antiaging sunscreens/creams; Dry Oils; and cleansing products.

Medium Chain Triglyceride is a **lightweight, skin-compatible emollient** derived from coconut oil, offering excellent spreadability and a dry, non-greasy finish. Stearoyl Glutamic Acid is a **naturally derived amino acid-based dispersant** that enhances particle stability and is **Non-Comedogenic, ECOCERT compatible, and Hypoallergenic**.
